

# Md. Ayub Adil Usmani

Kulti, West Bengal, India  
mdayubadil786@gmail.com | GitHub | LinkedIn

## Summary

Computer Science and Design undergraduate with internship experience in Web Development and UI/UX Design. Skilled in Python, C, HTML, CSS, JavaScript, Flask, and Figma, with experience building web applications, designing user-centric interfaces, and developing responsive digital products.

## Education

|                                                   |             |
|---------------------------------------------------|-------------|
| <b>Dr. B.C. Roy Engineering College, Durgapur</b> | 2024 – 2028 |
| B.Tech in Computer Science and Design             |             |
| <b>Green Point Academy, Kulti</b>                 | 2024        |
| CBSE Class XII (Science) – 78.2%                  |             |
| <b>Priyadarshini Public School, Kulti</b>         | 2022        |
| CBSE Class X – 80%                                |             |

## Experience

|                                                                                                                                                                                                                                 |                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>UI/UX Design Intern — Future Interns</b>                                                                                                                                                                                     | May 2026 – June 2026 |
| <ul style="list-style-type: none"><li>Designed responsive dashboards, mobile interfaces, and user workflows using Figma.</li><li>Created wireframes and high-fidelity prototypes following modern SaaS UX principles.</li></ul> |                      |
| <b>Web Development Intern — Pinnacle Labs</b>                                                                                                                                                                                   | Apr 2026 – May 2026  |
| <ul style="list-style-type: none"><li>Developed responsive web applications using HTML, CSS, and JavaScript.</li><li>Built interactive UI components and optimized layouts for mobile devices.</li></ul>                        |                      |

## Projects

|                                                                                                                                                                                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Habit Tracker — Flask, SQLite</b>                                                                                                                                                                                                                |
| <ul style="list-style-type: none"><li>Built a full-stack habit tracking application with authentication, streak tracking, and progress visualization.</li><li>Implemented SQLite database integration for efficient user data management.</li></ul> |
| <b>To-Do List App — HTML, CSS, JavaScript</b>                                                                                                                                                                                                       |
| <ul style="list-style-type: none"><li>Developed a task management application supporting task creation, completion tracking, and deletion.</li><li>Designed a responsive interface focused on usability and productivity.</li></ul>                 |
| <b>FlowSync CRM Dashboard — Figma</b>                                                                                                                                                                                                               |
| <ul style="list-style-type: none"><li>Designed a scalable CRM dashboard for lead and client management workflows.</li><li>Created user flows, wireframes, and interactive prototypes for business users.</li></ul>                                  |
| <b>Dentist Appointment Booking App — Figma</b>                                                                                                                                                                                                      |
| <ul style="list-style-type: none"><li>Designed 10+ mobile screens for appointment scheduling, doctor discovery, and booking management.</li><li>Created wireframes, user journeys, and high-fidelity healthcare app prototypes.</li></ul>           |

## Technical Skills

**Languages:** C ,Python ,Java ,JavaScript  
**Web:** HTML5, CSS3, Flask  
**Design:** Figma, Wireframing, Prototyping, User Flows, Canva  
**Tools:** Git, GitHub, VS Code, Dev C++, IDLE Python  
**Concepts:** Data Structures & Algorithms, OOP, Responsive Design, UI/UX

## Certifications

- UI/UX Design Internship – Future Interns
- Web Development Internship – Pinnacle Labs
- CDAC Finishing School Program in 3D Printing & Additive Manufacturing
- Augmented Reality and Virtual Reality Workshop
